Checklist-AUTH-01: Authentication & Registration Testing

ID	Requirement
REQ-AUTH-01	Registration fields: email (valid format, ≤ 64 chars, unique, case-insensitive), password 8–32 chars with ≥ 1 uppercase, ≥ 1 lowercase, ≥ 1 digit, confirm password (must match), first name and last name 1–50 chars (letters, hyphen, apostrophe), date of birth optional (age ≥ 16), Terms checkbox required.
REQ-AUTH-02	Inline validation on blur; the Register button stays disabled until all required fields are valid.
REQ-AUTH-03	Login with email + password. Wrong credentials show one generic message: "Invalid email or password".
REQ-AUTH-04	5 failed logins within 15 min lock the account for 15 min; the message shows the unlock time.
REQ-AUTH-05	Access token lives 15 min, refresh token 7 days; the UI refreshes silently. Logout revokes the refresh token.
REQ-AUTH-06	"Forgot password" sends a reset link to the in-app Demo Mailbox (/mailbox), valid 30 min, single use.
REQ-AUTH-07	A guest opening a protected page is sent to Login, then back to the original page after login.

1. Email Field

- [x] Enter a valid email
- [x] Enter an invalid email
- [x] Leave email empty
- [x] Enter a 64-character email
- [ ] Enter a 65-character email *(BUG_ID: BUG-AUTH-03)*
- [x] Enter email in uppercase
- [x] Enter the same email twice

2. Password & Confirm Password Fields

- [x] Enter 7 characters with uppercase, lowercase, and digit
- [x] Enter 8 characters with uppercase, lowercase, and digit

- [x] Enter 32 characters with uppercase, lowercase, and digit
- [x] Enter 33 characters with uppercase, lowercase, and digit
- [x] Enter 8 characters without uppercase
